1. Regarding the IDS filed March 15, 2001 (Paper No. 3), copies of most of the references listed thereon are located in various patent applications. It is noted that copies of a few of these references have been provided in the instant application. The parent applications are currently unavailable to the examiner. Consequently, the only citations that have been initialed correspond to the copies that have been provided in the instant application. It is suggested that applicant provide a copy of the foreign patent documents and the non-patent literature listed in the PTO 1449, so that they may be placed in the instant application.

2. The request to correct the inventorship in this nonprovisional application under 37 CFR 1.48(a)(1) requesting addition of an inventor(s) is denied because this issue has already been decided by the Board of Patent Appeals and Interferences in an interference proceeding.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(f) he did not himself invent the subject matter sought to be patented.

4. Claims 9-12, 14-17, 19 and 21-28 are finally rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter. In view of the decision in Patent Interference No. 104,311, it is determined that applicant did not invent the claimed subject matter such as the pump shaft and motor shaft being disposed perpendicular to each other.

5. Applicant's arguments filed September 26, 2003 have been fully considered but they are not persuasive. As discussed above, the Request to Correct Inventorship has been denied since this issue has already been decided by the Board of Patent Appeals and Interferences in an interference proceeding.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
